## CUSTOMIZABLE COMFORT

The new Buster XXL is a spacious wonder. Its great customization, versatile accessories and ample stowage space, lockable with a single key, provide completely new possibilities for boating. The XXL has been specifically designed with ergonomics and travel comfort in mind. An extensive rear area provides plenty of room to move and several possibilities for usage.

Carefully selected materials, such as surface-finished marine aluminum and tempered glass, ensure that the XXL is durable, safe, and carefree, even in the speediest turns. As with all the current Buster models, the hull is extremely easy to maintain. The hard shiny surface prevents dirt

from sticking, so the boat can be easily washed with only water.

### Controlled ergonomics

Ergonomic, carefully positioned control equipment that is clearly visible completes an enjoyable boating experience.

The driver's console includes lockable stowage and installation space for electronics, which is suited for a GPS navigator or an echo sounder,

for example. The screen can be lifted up when boating, and can be easily put back to a safe location under the deck and locked away out of sight when in dock.

*The Buster XXL is suited for many kinds of uses – and for many kinds of users.*

LENGTH 6.35 M • WIDTH 2.40 M • ENGINE RECOMMENDATION 90–150 HP • SEATING CAPACITY 7

# COMFORTABLE BOAT DESIGN

The ideal rear part of the boat is spacious, safe, and practical. The boat is easy to board thanks to a solid handrail. In addition, **wide steps** ① and stable railings make moving around easy. A well-protected **fuel tank filling hole** ② is in the rear, under the lid of a lockable rope box.

The XXL's bow can be optionally equipped with capacious storage boxes that also serve as seats.

## Clear windshield in all conditions

The passenger area is well protected from wind chill, ensuring first-class passenger comfort. In addition, the size and shape of the windshield efficiently prevent chill effects.

The large **blow heads** ③ at the bottom of the windshield and the optional heater provide comfort even during rainy and cool conditions. The windshield keeps clear – and the driver warm.

Another XXL accessory is a cover that can be deployed quickly and easily from the **cover box** ④.

## SWIFT CUSTOMIZATION

Between the consoles is a light and advanced **sliding door** ① which makes moving around the bow easier than ever before. The door is made from a rugged aluminum profile and durable polycarbonate.

The XXL's innovative **sliding sofa** ② improves passenger comfort. When the sofa is switched to a frontal position for driving, the passengers are comfortably out of the reach of wind chill. At the same time, communication between the cockpit and the passenger area is effortless even at faster speeds.

Buster's sliding sofa uniquely combines the possibility to

move the sofa in the passenger area and the option to alter the position of backrests and armrests. Friends of water sports and fishing should be especially glad to learn about the backrest that can be turned onto the front edge of the sofa; when the backrest is turned in this position, two people can travel facing backwards.

Armrests can also be up-turned to improve passenger comfort and safety.

If required, the sofa can be completely removed, which makes the already abundant rear space even more suited for different kinds of activities.

### Plenty of stowage space – cooled as well

The body of the sofa can be used as a large, dry stowage space that can be conveniently locked with the same key as the other locks in the boat.

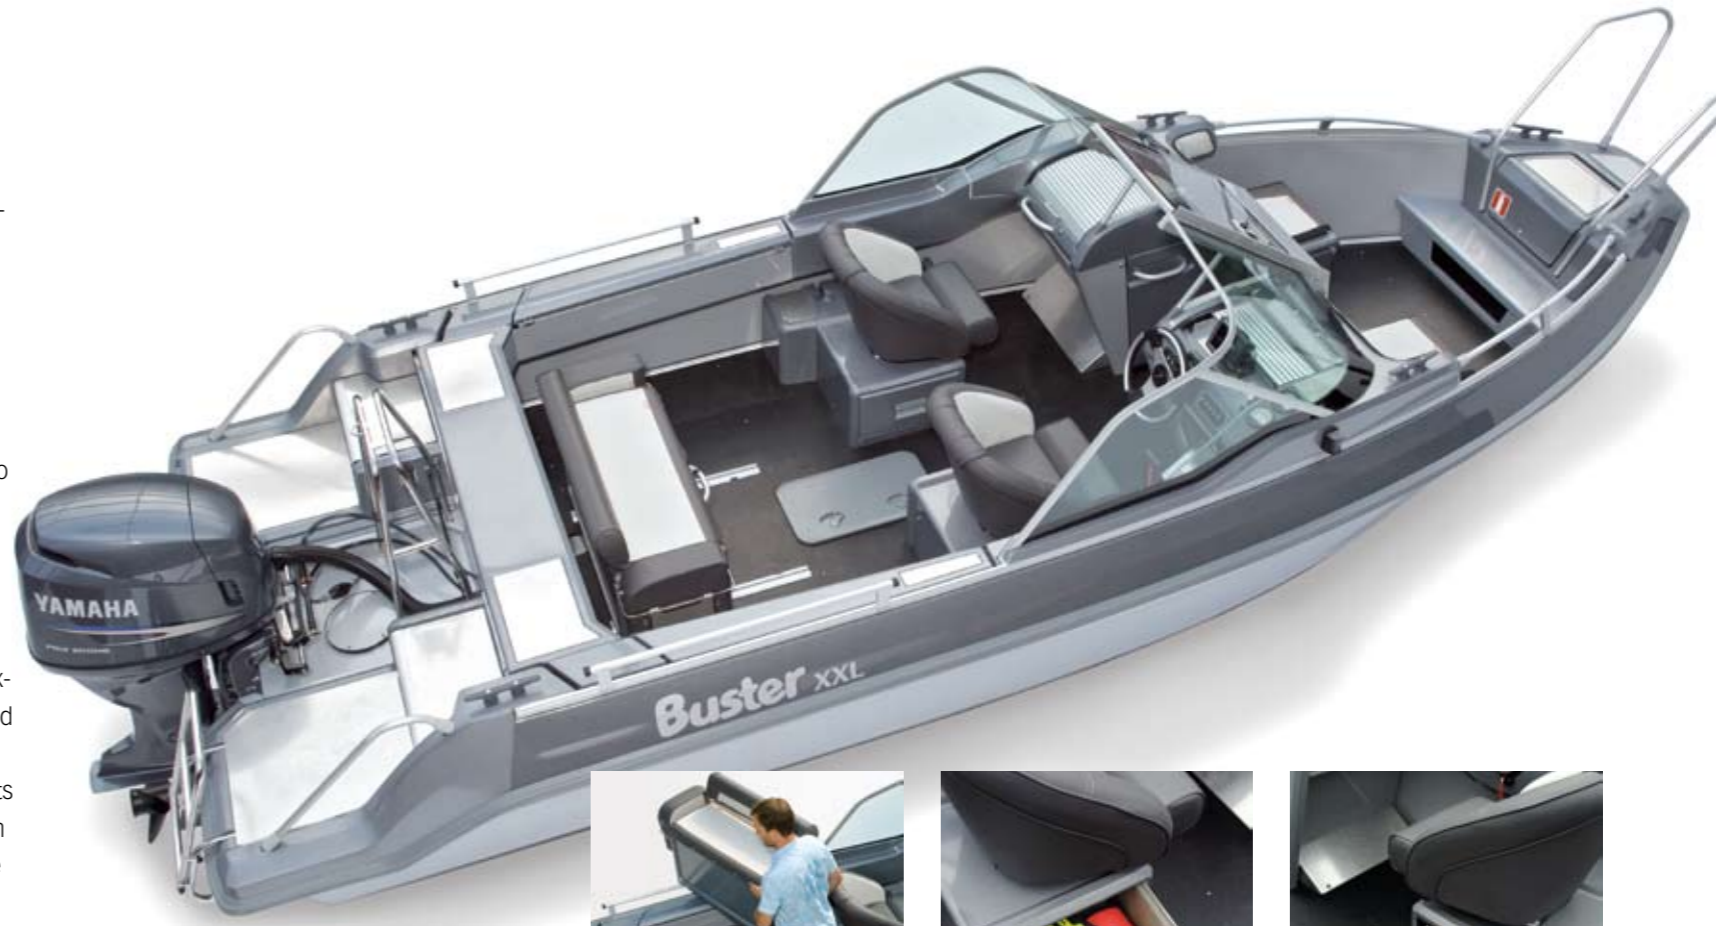

The versatile and **customizable stowage space** ③ has been placed in both consoles and under the rotating cup seats. There are standard 12 volt electric plugs under the left seat and console. There is plenty of space for different boating equipment and items in the lockable stowage cabinets under the consoles. Another option is a refrigerator that is also mounted under

the left seat. Passenger comfort is further increased with **stands for bottles** ④ and **other small items**.

Rods, water skis, and paddles can be smoothly dropped through the trap door and into the **stowage box at the bottom of the boat** ⑤.

### Sturdy and handy locks

The Buster XXL's stowage boxes and fuel tanks are equipped with **serial Abloy locks** ⑥. The fuel tank filling hole and its cap has been carefully hidden from view under the lid of the rope box.
